

MERRIDALE[®]

VEHICLE TRANSPONDER

On-board vehicle transponder for automatic transfer of vehicle odometer and distance information to the fuel management system.

TRANSPONDER

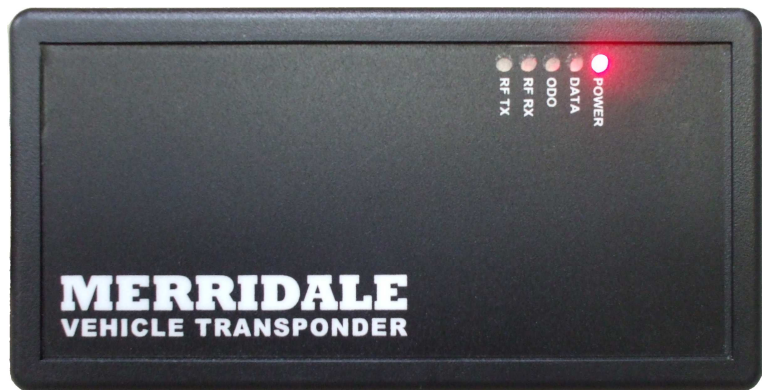

Features

- Provides automatic and secure transfer of vehicle odometer without the need for manual entry
- Eliminates incorrect manual odometer entry
- Connects to CAN bus or pulse output from vehicle
- May be used in conjunction with vLink, Datatag, Datakey, Mag-stripe card or other vehicle identification
- May be retrofitted to most existing Merridale fuel management systems
- Simple installation

Vehicle Transponder

- Used in conjunction with the Merridale vLink or other identifier to securely and quickly send back distance and odometer data from the vehicle to the fuel management system without user interaction.
- Suitable for buses, trucks and vans.
- Accurate and automatic odometer capture from CAN and RS485 vehicle data buses.
- Pulse input for fitting to vehicles without CAN bus or where odometer information is not available.

Fuel Management System with vLink and Vehicle Transponder
